

SFO Thematic school 2025

Lithium Niobate on Insulator integrated photonics

The Houches Physics School, France, May 12 to 23 - 2025

Each year, Les Houches School of Physics welcomes young physicists from all over the world to acquire and perfect their scientific knowledge in a magnificent location nearby Mont Blanc Mountain, south-east of France. Over the last 70 years, about 50 Nobel Prize winners and several Fields medalists have taught at Les Houches School of Physics.

Rachel Grange, Andreas Boes, Arnan Mitchell, and myself, are delighted to inform you the organization of a workshop at Les Houches School of Physics from **May 12 to 23, 2025** dedicated to Lithium Niobate on Insulator and entitled :

Lithium Niobate on Insulator integrated photonics, from fabrication to classical and quantum applications

Top scientists and researchers working in the field will contribute to this gathering by giving plenary talks to about 60 participants. Among the guests who accepted to participate in this workshop: Martin Fejer, Marko Loncar, Amir Safavi, Christina Benea-Chelmus, Christine Silberhorn, Tobias Gehrin, Aaron Danner, and Katia Gallo.
